

To all FCC Commissioners,

After reading the petition concerning AM radio stations using FM translators, I am in support of this petition because AM stations play an important role in the community they serve.

The public needs to be able to hear their AM station at all times and it should be available to them during hours when the station is broadcasting on low power.

AM stations should be allowed to use FM translators. It's a smart idea and should be approved.

I look forward to seeing what the FCC does concerning this matter.

Thank you for your time.
